DETAILED ACTION

1. The finality of the rejection of the last Office action is withdrawn.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-18, 43, and 44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not state only one start record and only one stop record are sent for a plurality of short data burst transmissions. It is further unclear what this start and stop record is incorporating. Is this a data packet transmission that would inherently incorporate records?

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-18, 43, and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bullard et al. (US Patent 6,405,251) in view of Monte et al. (US Patent 6,023,606).

Bullard et al. discloses the claimed method to optimize accounting records in a packet data network and discusses accounting records for "a mobile user" (column 4, line 52) but is unclear if this applies to a wireless packet data network. Monte et al. discloses that it is known in the art to provide a wireless packet data network in order to track billing for accounting for satellite communications system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the method of Bullard et al. with the wireless packet data network of Monte et al., in order to provide accounting for satellite communications systems.

Bullard et al. discloses detecting a communication link has been established between a mobile terminal and a host in a packet data network; and accumulates at a node accounting information relating to a communication network serving a mobile terminal and the packet data network, the accounting information being used by service providers to generate billing data; where only one start and one stop record are sent to the accounting server for a plurality of short data burst transmissions (see columns 7 and 8 and table 1 regarding start and stop records).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
